Cappfinity

Candidate Integrity Tracker
November 2023

Integrity Insights

Across November 2023, we have data from **265,871** assessments.

From November 2023 relative to November 2022, we saw mean scores increase by **+1.42%**. This is entirely consistent with the normal variations that we see from year to year.

There continues to be no evidence of cheating or inflated scores due to generative AI.

Of Interest

Digging into the data further, we examined how mean scores were changing month on month – the data show that mean scores for November 2023 are 4.39% *lower* than for October 2023.

Comparing pass rates, the data show pass rates *reduced* by 8.03% in November 2023 relative to November 2022.

With mean scores declining, and pass rates reducing year on year, this is more strong and consistent evidence that generative AI is not enabling candidate cheating in the way that some feared.

At Cappfinity, we will always be guided by the data.

Cappfinity releases the Candidate Integrity Tracker each month, to track any overall industry indicators of candidate integrity. Cappfinity data scientists review our proprietary data sources to derive ongoing insights into candidate integrity and assessment-taking behaviour.
